

TEAM DETAILS:

TEAM NAME: DEAL

LEADER: S JAIADITYAN

TEAMMATE: PERLA SREE NEHA

DESCRIPTION OF PROJECT:

There are three main options for the customers. The three options are:

1. Customers can buy rice products from the warehouse.
2. Customers can buy crops from retailers.
3. Farmers can sign in through the login page or sign up and verify their identity by uploading a receipt that the warehouse gave to him/her once it's verified farmer can get at least 10% of the profit.

ADVANTAGES:

1. Flexibility for the consumers.
2. Profit to the farmers.
3. Discount to the consumers.
4. Profit to warehouses.
5. The process is done without affecting other groups.

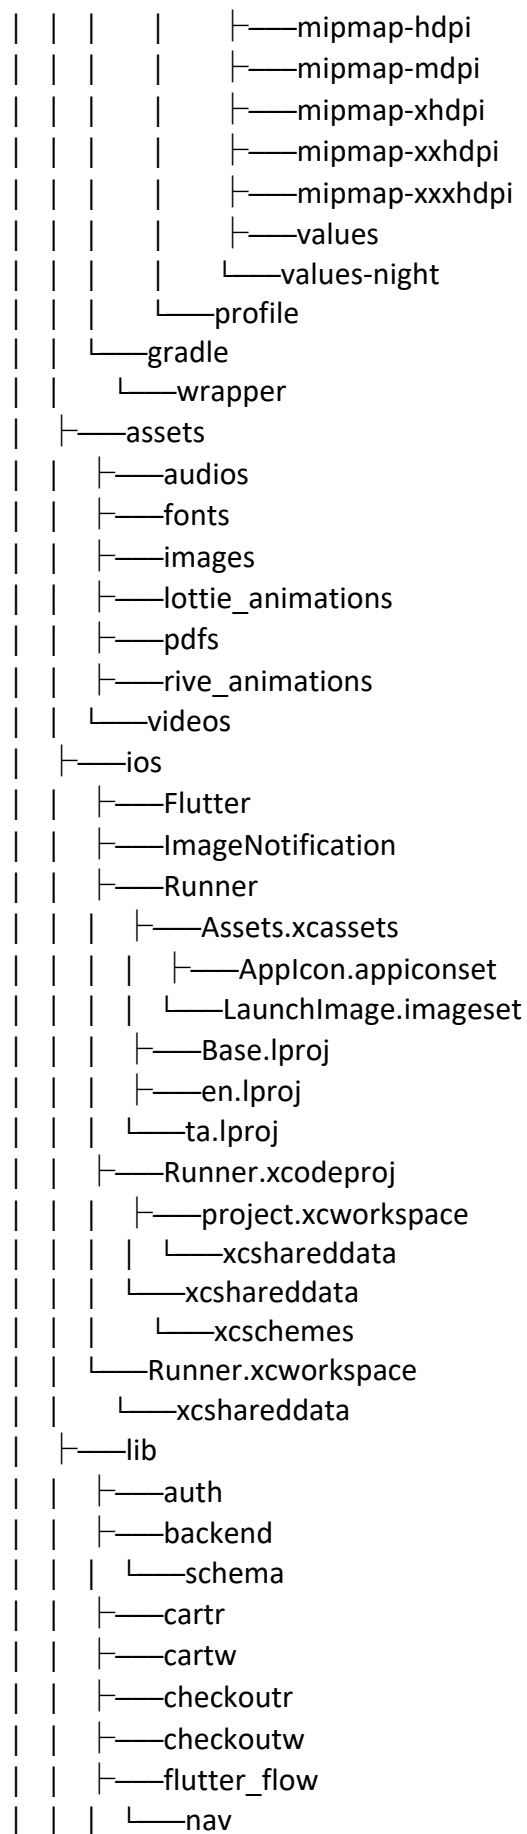

WHAT WE'VE BUILT?

A Multi-platform where we connect farmers and consumers in various ways like BC (business to consumer) and BBC (business to business to consumer) in which farmers are profitable.

DIRECTORY STRUCTURE:

Folder PATH listing for Application
